

## Installation of Orange Data Analytics

**Orange** is an open-source data visualization, machine learning, and data mining toolkit. It features a visual programming front-end for explorative rapid qualitative data analysis and interactive data visualization.

You will install the Orange software using the following steps in this activity.

1. Go to the website <https://orangedatamining.com/> and click on the button 'Download Orange'.

2. Select 'Portable Orange' to download the zipped file. The file version is Orange3-3.33.0.zip at the point when this document is developed. Using Portable Orange, no installation is needed. You only need to extract the archive and open the shortcut in the extracted folder. (Note: Ensure you have at least 1.8 GB of disk space on your laptop/PC). Due to the file size may take a while to download over Wifi/Broadband.

Windows

macOS

Linux / Source

Download the latest version for Windows

[Download Orange 3.33.0](#)

Standalone installer (default)

Orange3-3.33.0-Miniconda-x86\_64.exe (64 bit)

Can be used without administrative privileges.

Portable Orange

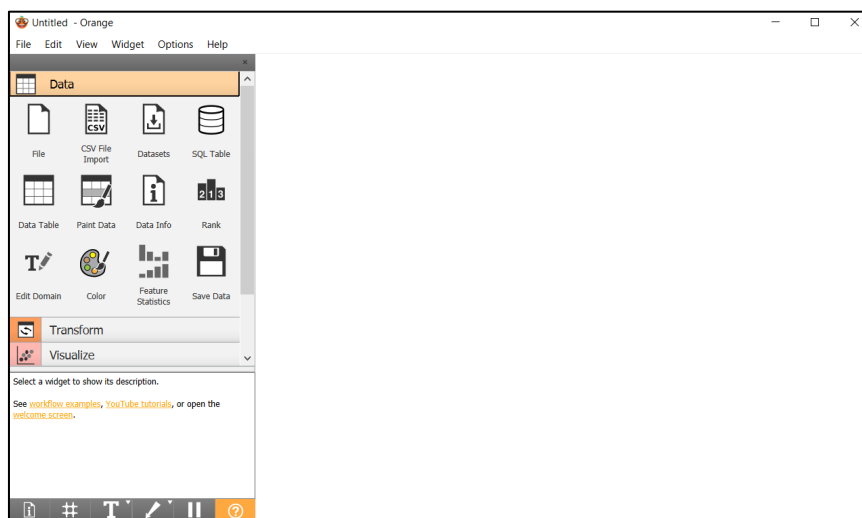

[Orange3-3.33.0.zip](#)

No installation needed. Just extract the archive and open the shortcut in the extracted folder.

3. Extract the file after it is downloaded to your local drive. Again, due to the file size, this may take a while.
4. After extracting the files, click on the shortcut file to launch Orange.

Name	Date modified	Type	Size
Orange	4/10/2022 1:57 pm	File folder	
Orange	4/10/2022 1:57 pm	Shortcut	2 KB

5. You will see the interface shown below.
